

Contents

Chapter 1

Introduction to Structural Modeling

Chapter 1.....	5
1.1 Introduction	7
1.2 Free-body diagram.....	11

Chapter 2

Loads

Chapter 2.....	13
2.1 Introduction	15
2.2 Types of loads.....	16
2.2.1 Point load.....	18
2.2.2 Uniform load	19
2.2.3 Non-uniformly distributed load.....	19
2.2.4 Moments	22
2.3 Loads distribution in a concrete structure	24
2.3.1 Loads on slabs	25
2.3.2 Loads on beams	27
2.3.3 Loads transfer from slabs to beams.....	29
2.3.4 Loads transfer from beam to other beam	34

Chapter 3

Supports and Reactions

Chapter 3.....	35
3.1 Introduction	37
3.2 Types of supports	37
3.2.1 Roller support.....	39
3.2.2 Hinged support	41
3.2.3 Fixed support.....	43
3.2.4 Link support.....	45

3.2.5 Intermediate hinge	46
3.3 Equilibrium	48
3.3.1 Equilibrium of forces	48
3.3.2 Equilibrium of moments	48
3.4 Calculation of reactions	50
3.5 Examples	51

Chapter 4

Stability and Determinacy

Chapter 4	67
4.1 Introduction	69
4.2 Stability	69
4.3 Determinacy	73

Chapter 5

Internal Forces for Beams

Chapter 5	81
5.1 Introduction	83
5.2 Determination of internal forces at a section	86
5.2.1 Normal force	87
5.2.2 Shear force	91
5.2.3 Bending moment	96
5.3 Relations between load, shear and moment	100
5.4 Internal forces diagrams	106
5.4.1 Normal force diagram	106
5.4.2 Shear force diagram	109
5.4.3 Bending moment diagram	118
5.5 Maximum bending moment and its position	129
5.6 Common cases of loading	131
5.7 Principle of superposition	139
5.8 General Examples	141
5.9 Problems	151

*Chapter 6***Analysis of Statically Determinate Frames**

Chapter 6.....	153
6.1 Introduction	155
6.2 Calculation of reactions.....	155
6.3 Determination of internal forces	165
6.4 Internal forces diagrams	165
6.5 Problems	186

*Chapter 7***Analysis of Statically Determinate Arches**

Chapter 7.....	189
7.1 Introduction	191
7.2 Calculation of reactions.....	192
7.3 Determination of internal forces at a section	196

*Chapter 8***Analysis of Statically Determinate Trusses**

Chapter 8.....	197
8.1 Introduction	199
8.2 Classification of trusses.....	203
8.2.1 Simple truss	203
8.2.2 Compound truss.....	204
8.2.3 Complex truss.....	204
8.3 Stability and determinacy.....	205
8.4 Method of joints	211
8.5 Method of sections	222
8.6 Space trusses.....	235

*Chapter 9***Influence Lines**

Chapter 9.....	239
9.1 Introduction	241
9.2 Methods used to plot influence lines.....	245

9.3 Basic Method	245
9.3.1 Influence lines for beams	246
9.3.2 Influence lines for trusses.....	267
9.4 Kinematic Method	270
9.5 Calculation of maximum influence at a point	276
9.5.1 Maximum influence due to concentrated loads	276
9.5.2 Absolute maximum influence	278
9.5.3 Maximum influence due to uniform loads	282
9.6 Cases of loading and envelopes	283

Chapter 10

Computer Applications

Chapter 10.....	293
10.1 Introduction	295
10.2 Selecting units	296
10.3 Editing the frame	296
10.3.1 Editing the frame using the templates.....	296
10.3.2 Editing the frame graphically.....	297
10.4 Editing supports.....	299
10.5 Assigning member sections	300
10.6 Assigning static load cases	301
10.7 Defining material properties.....	303
10.8 Running analysis	304
10.9 Checking the results	305
References.....	307
